## DORIS

*The solution for recovering stranded algae, without any environmental footprint.*

The Doris can pick up seaweed washed up on the beach without collecting sand.  
A real time-saver, the small model can fill a standard tipper truck  
in just 30 minutes.

- Collects 100% seaweed and 0% sand.
- Emptying by shock.
- Requires no more than 2 operators.
- All you need is a standard tipper truck and a tractor, without a screening machine.
- Custom built, its dimensions can adapt to any tractor.
- Its efficiency is enhanced when coupled with a tractor fitted with a telescopic arm.
- Entirely manufactured in France.

*Included : operating, maintenance and safety instructions provided by our team.*
